### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with applicant's representative, Peter B. Martine (Reg. No. 32,043), on March 26, 2009.

The application has been amended as follows:

- In claim 1, please replace lines 16-17 with the recitation -- executing image processing of said image data in said image processing apparatus using said set picture quality adjustment parameters. --.

### **DETAILED ACTION**

Applicant's arguments (see pages 11-13) filed on January 5, 2009, with respect to claims 8 and 12 have been fully considered and are persuasive. The prior art rejection of claims 8 and 12 has been withdrawn.

### ***Allowable Subject Matter***

#### **Claims 1-15 are allowed.**

The following is an examiner's statement of reasons for allowance:

**Claims 8 and 12** teach a method and apparatus for executing image processing of image data that has been associated with at least one set of information selected

from shooting information that indicates shooting conditions at the time of shooting, and image processing control information that designates a plurality of picture quality adjustment parameters to be used during image processing, said image data being associated with the at least one set of information selected from said shooting information and said image processing control information by an image data generating apparatus, wherein the method and the associated apparatus corresponding said method comprises selecting either said shooting information or said image processing control information; acquiring as information either said selected shooting information or said image processing control information; and executing picture quality adjustment processing of said image data in an image processing apparatus using said acquired information, said image data generating apparatus and said image processing apparatus being separate bodies, which is neither anticipated by nor rendered obvious by the relevant prior art.

Regarding **claims 1-7, 9-11 and 13-15**, reasons for allowance are as discussed in the previous Office action mailed on September 5, 2008.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The following prior art, made of record and not relied upon, is considered pertinent to applicant's disclosure.

Nakami (US Application Publication No. 2003/0035127) discloses an image file generation device wherein image processing control information is added to an image file.
